

SURVEYING CAPABILITIES

Daly.Smith offers expert surveying services for projects ranging in size from single dwellings and dual occupancy developments, to multi-stage, master planned estates.

Our surveying department has been the foundation from which we have grown after 30+ years of successful operation. Our team of Surveyors are highly skilled and professional in providing a wide range of surveying services to our clients.

Armed with the latest state of the art survey equipment, our surveyors achieve millimetre accuracy and speedy delivery. Our superior technologies enable our office staff to import and process field data in real-time. This ensures that any disruptions can be minimised with solutions to any difficulties that arise being worked out without the need for field surveyors to return to base.

Our surveyors undertake continual professional development and training to ensure best practice surveying methods are utilised and our high standard of service is maintained.

The integration with our engineering and planning departments gives our team unique and diversified skills that provide our clients with an optimised and whole service.
